

Transporting the Slate

Why was this aerial ropeway built?

What is the ropeway used for?

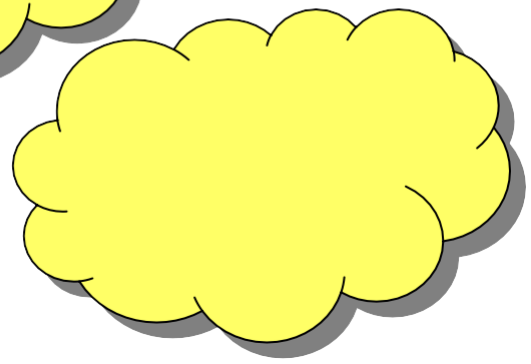

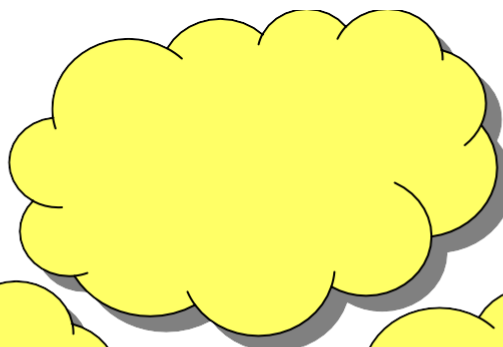

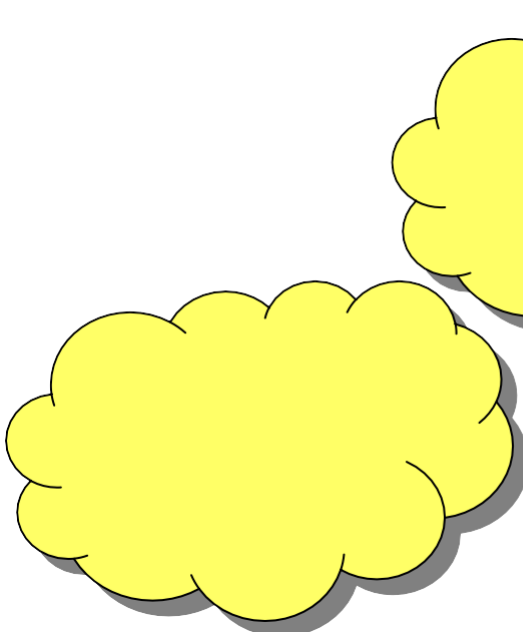

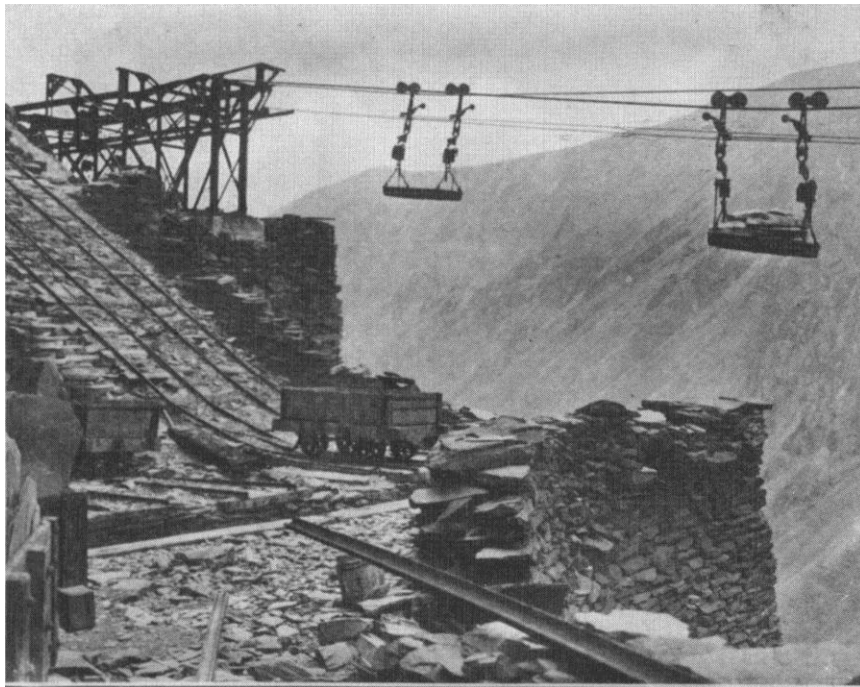

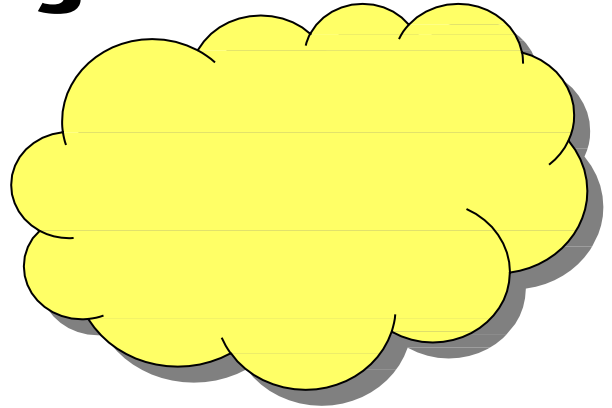

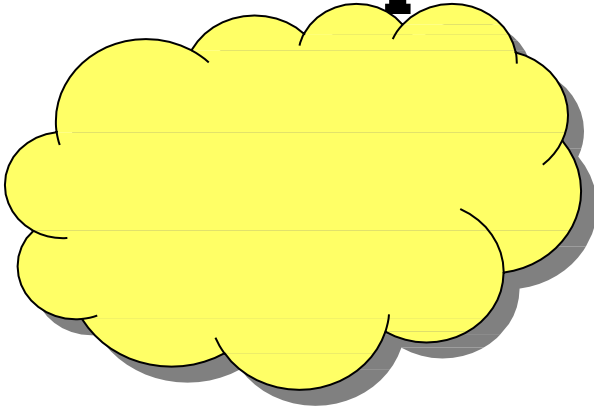

How was the ropeway powered?

Where was the slate being transported to?

Why is one pallet empty and one full of slate?

Task: Look at the questions on the last sheet. Now in the speech bubbles below, write your answers in bullet points.

Transporting the Slate

Only some of the Aerial Ropeway survives today. What use do you think Honister could put it to? How might people who visit Honister today like to experience something like this?

Task: Either a) Write an account to explain how slate was moved in the past **or**
b) Create an advert from the company who persuaded Honister buy and use this **or**
c) Write a plan to suggest how this could be used today for modern day visitors?

Transporting the Slate
